1. **Monday, June 21st · 19:00 – 20:00 pm CET**
   The SmartFix® Concept with OsseoSpeed™ Profile EV implants -
   Fabienne Oberhansl, Dr

   The SmartFix® concept allows fixed, full arch immediate restorations for (almost) edentulous patients on 4 implants with no or little augmentations in one day.

   During the presentation we will go through:
   - anatomical considerations, studies and cases
   - discuss limitations and indications of the concept
   - we will talk about advantages using the OsseoSpeed™ Profile EV implant design

2. **Monday, June 28th · 19:00 – 20:00 pm CET**
   Compromised Teeth as support for implant treatment optimization –
   Kristina Badalyan, Ph.D, Prof

   During this lecture we will discuss indications for compromised teeth used as a biological material for optimizing implant treatment, including the timing of the treatment. Techniques such as orthodontic extrusion, tooth replantation and autotransplantation will be shown in clinical examples, and the advantages and disadvantages with these methods will be covered.

4. **Monday, September 27th · 19:00 – 20:00 pm CET**
   Azento and Simplant - easy and guided implant treatment -
   Malene Hallund, Dr

   The webinar will reveal how guided surgery and contributes to predictable and accurate implant surgery and offers a variety of implant treatment options which can complement and often eliminate advanced bone augmentation techniques. These factors improve the patient experience and allows the surgeon to operate with an increased level of confidence and less chairside time.
